SOFTWARE ENGINEERING TECHNOLOGY STUDENT – AI | CO-OP STUDENT

PYTHON | SQL | ANALYTICAL THINKING

- Software Engineering Technology (AI) student with practical experience in Python programming, database design, and web development gained through coursework and real client projects.
- Completed specialized training in Artificial Intelligence using Python, building foundational AI knowledge alongside core programming skills.
- Applied SQL and database design principles to build a working database system for a cloud kitchen, managing menu, order, and inventory data.
- Delivered two freelance web development projects for real clients, using HTML, CSS, JavaScript, and WordPress to build fully functional business websites.
- Skilled in translating client requirements into functional solutions, communicating directly with remote clients from planning through delivery.

TECHNICAL SKILLS:

Programming: Python, SQL, Java, C#, JavaScript, HTML/CSS

Operating Systems: Unix, Linux, Windows

Database: SQL, MySQL, PostgreSQL, ER Diagrams, Normalization

Development Tools: Git/GitHub, Visual Studio Code, Jupyter Notebook, Anaconda

Software Development: SDLC, Object, SRS Document

Other Tools: MS Office, MS Visio, Slack, Lucid-chart

Professional Skills: Time Management, Team Collaboration, Problem-Solving, Client Communication

EDUCATION:

Software Engineering Technology – Artificial Intelligence (Co-op) Advanced Diploma

Sept. 2025 – Present

Centennial College, Toronto, ON

Relevant Courses: Python Programming | Software Fundamentals & Requirements | Web Interface Design |

C# Programming | Database Concepts (SQL) | AI Foundation | Introduction of AI | Client-Side Web

Development | Linux/Unix OS | AI System Design | Java Programming | Web Development Application

ACADEMIC PROJECTS:

Cloud Kitchen Database | SQL

- Built a SQL database that allows a cloud kitchen to store, update, retrieve, and manage data on menu items, orders, customers, and inventory.
- Collaborated with a team of developers to deliver the project on schedule, tracking milestones and supporting quality assurance to ensure the final product met all requirements.

Multipage Restaurant Website | HTML, CSS, JavaScript

- Built a responsive, multi-page site for browsing menu items and placing orders.
- Created a scrolling image gallery and contact form for customer engagement.
- Programmed a cost calculator to total item prices including tax.

Registration Form Application | C#

- Built a registration and login form application in C# allowing users to input name, age, sex, and contact preference.
- Implemented login validation logic that displays a success pop-up when entered credentials match registered data, or a failure message otherwise.
- Designed input fields including text boxes and radio buttons to capture and structure user data accurately.

PROFESSIONAL DEVELOPMENT

Artificial Intelligence using Python Digi-Skills (Online)

July 2026

WordPress Digi-Skills (Online)

Aug 2020

RELATED EXPERIENCE

Freelance Web Developer (Remote)

Nov 2021 to Aug 2022

- Designed and developed a WordPress business website for a kitchen and bathroom renovation company, customizing layout and styling using HTML, CSS, and JavaScript.
- Built a portfolio gallery and testimonials section to showcase completed projects, improving how the business presents its work to potential clients.

Freelance Web Developer (Remote)

Aug 2020 to Nov 2021

- Developed a multi-page business website for a web development and digital marketing consulting firm, structuring service, about, and contact pages using HTML, CSS, and JavaScript.
- Built out dedicated service pages covering e-commerce, SEO, and branding offerings, making it easier for potential clients to understand the company's services.
